DETAILED ACTION

Specifications

1. The disclosure is objected to because of the following informalities:
 - a. various typographical and grammatical errors, for example: page 3 lines 23-24 and line 33;
 - b. consistency in language in the method steps, i.e. "preparing" on page 5 lines 15-27 continues to the entire page 6;

Appropriate correction is required.

Claims

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. The disclosure of
 - a. claim 10 as recited where the method steps are confusing. The applicant is requested to use consistency in reciting the method steps, for example, "for preparing" or "preparing".
 - b. claim 1, the phrase including "...proviso that R² in [sic]...", it appears the applicant intended to say "is" rather than "in".

Appropriate correction is required.

Claim Objections

4. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Information Disclosure Statement

5. The information disclosure statement filed February 10, 2006 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the specification recites 1) references that are not included in the IDS; and, 2) the Foreign Patent Document DE2023000 and the references by Bestmann et al., Cagniant et al. and Gotthardt et al. are in non-English language. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

6. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the examiner on form PTO-892 has cited the references, they have not been considered.
